

1st NOAR EUROPE ANNUAL MEETING

3rd to 5th November
2025

Onepoint - 3 rue Lavoisier,
44100 NANTES

The first edition of NOAR Europe Annual meeting, the European network dedicated to astatine-211 (astatine-net.eu), will take place from 03-05 November 2025 in Nantes, France.

In response to the success of COST NOAR and the Final Global Meeting 2024, and to enable our network to flourish, we felt it was important to offer these meeting days to share our vision with you.

These three days of meetings between academics and industrials from Europe and around the world are organized to present our new European network NOAR Europe, its organization, missions and objectives without forgetting its positioning through the WAC.

Participants from Europe, America and Asia, from academia and industry, will be together to discuss the challenges and prospects for the astatine-211 targeted alpha therapy sector.

Plenary sessions, round tables and networking evenings will be on the agenda to facilitate exchanges between the various players.

150 participants, European and International from Academia and Industry are expected

Nantes, located in western France on the Loire River, is a city known for its history, culture, and scenic surroundings. From medieval architecture in the Bouffay district to the impressive Château des Ducs de Bretagne, Nantes offers a charming blend of old-world charm and modern creativity. Art lovers can explore the whimsical Machines de l'île, while food enthusiasts can savor local cuisine at lively markets. With its proximity to the Loire Valley and Atlantic coast, Nantes is a captivating destination offering history, culture, and natural beauty.
